

# PoWA 4

Beta is out!

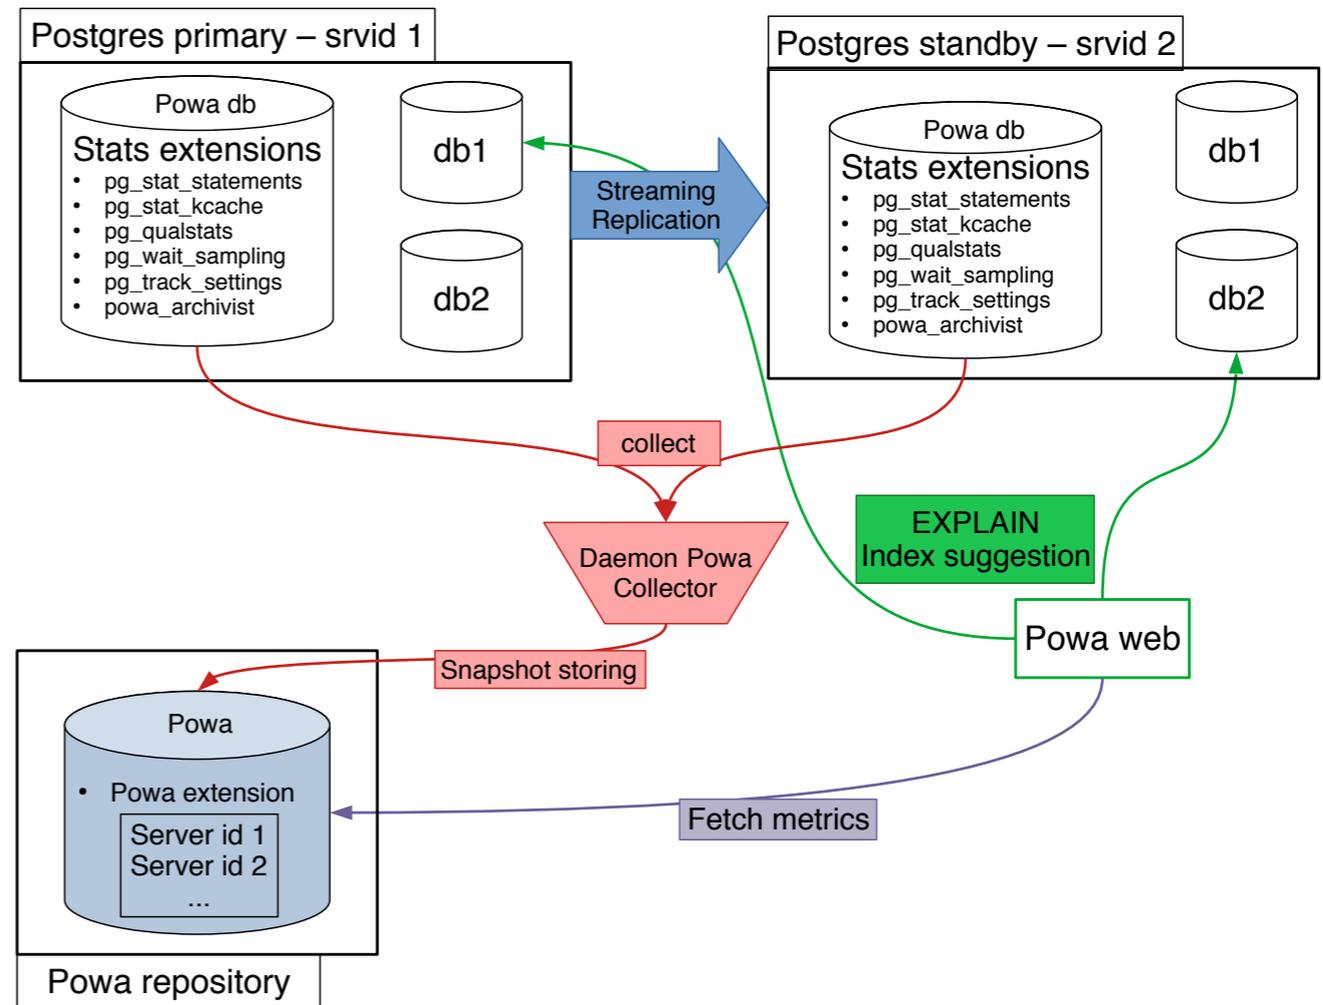

<https://github.com/powa-team/>

# What it does

- Insight on realtime workload
- Snapshot statistics on regular interval
  - `pg_stat_statements` metrics
  - Wait events sampling (thanks to `pg_wait_sampling`)
  - CPU / physical disk usage (thanks to `pg_stat_kcache`)
  - Predicate sampling (thanks to `pg_qualstats`)
  - ...
- Dashboards, displaying charts and graphs
- Wizard to analyse data and perform global index suggestion

# New architecture

- Remote mode
- Save data on remote instance
- Works on standby

# Multiple instances

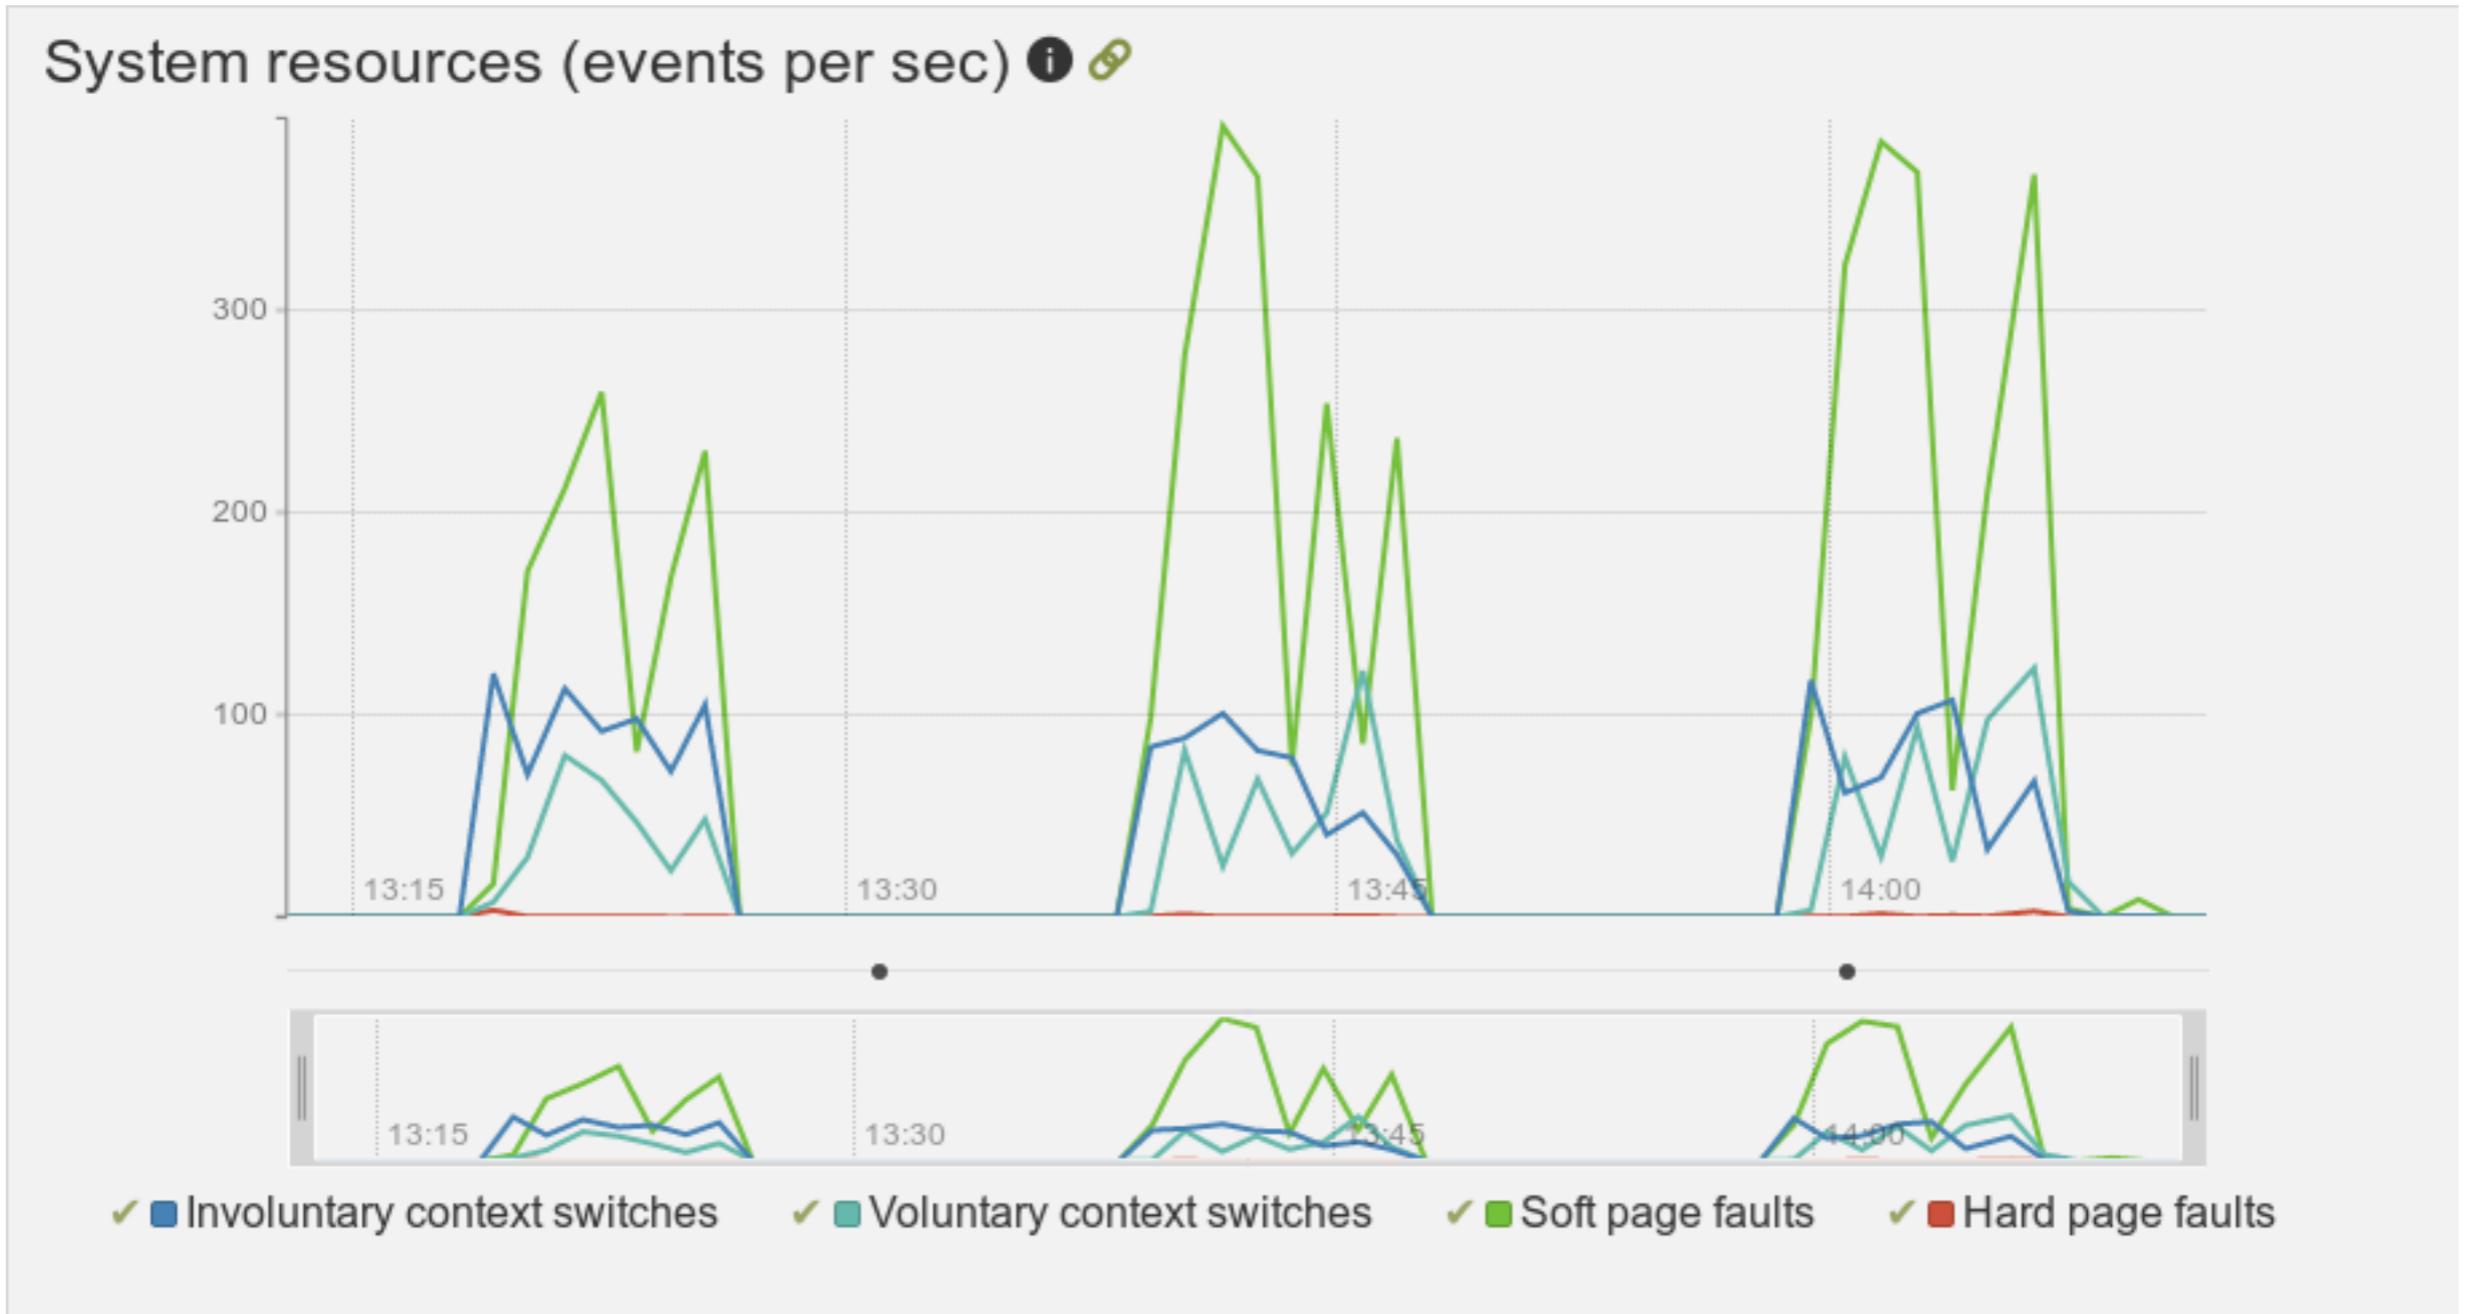

All servers

[Export CSV](#)

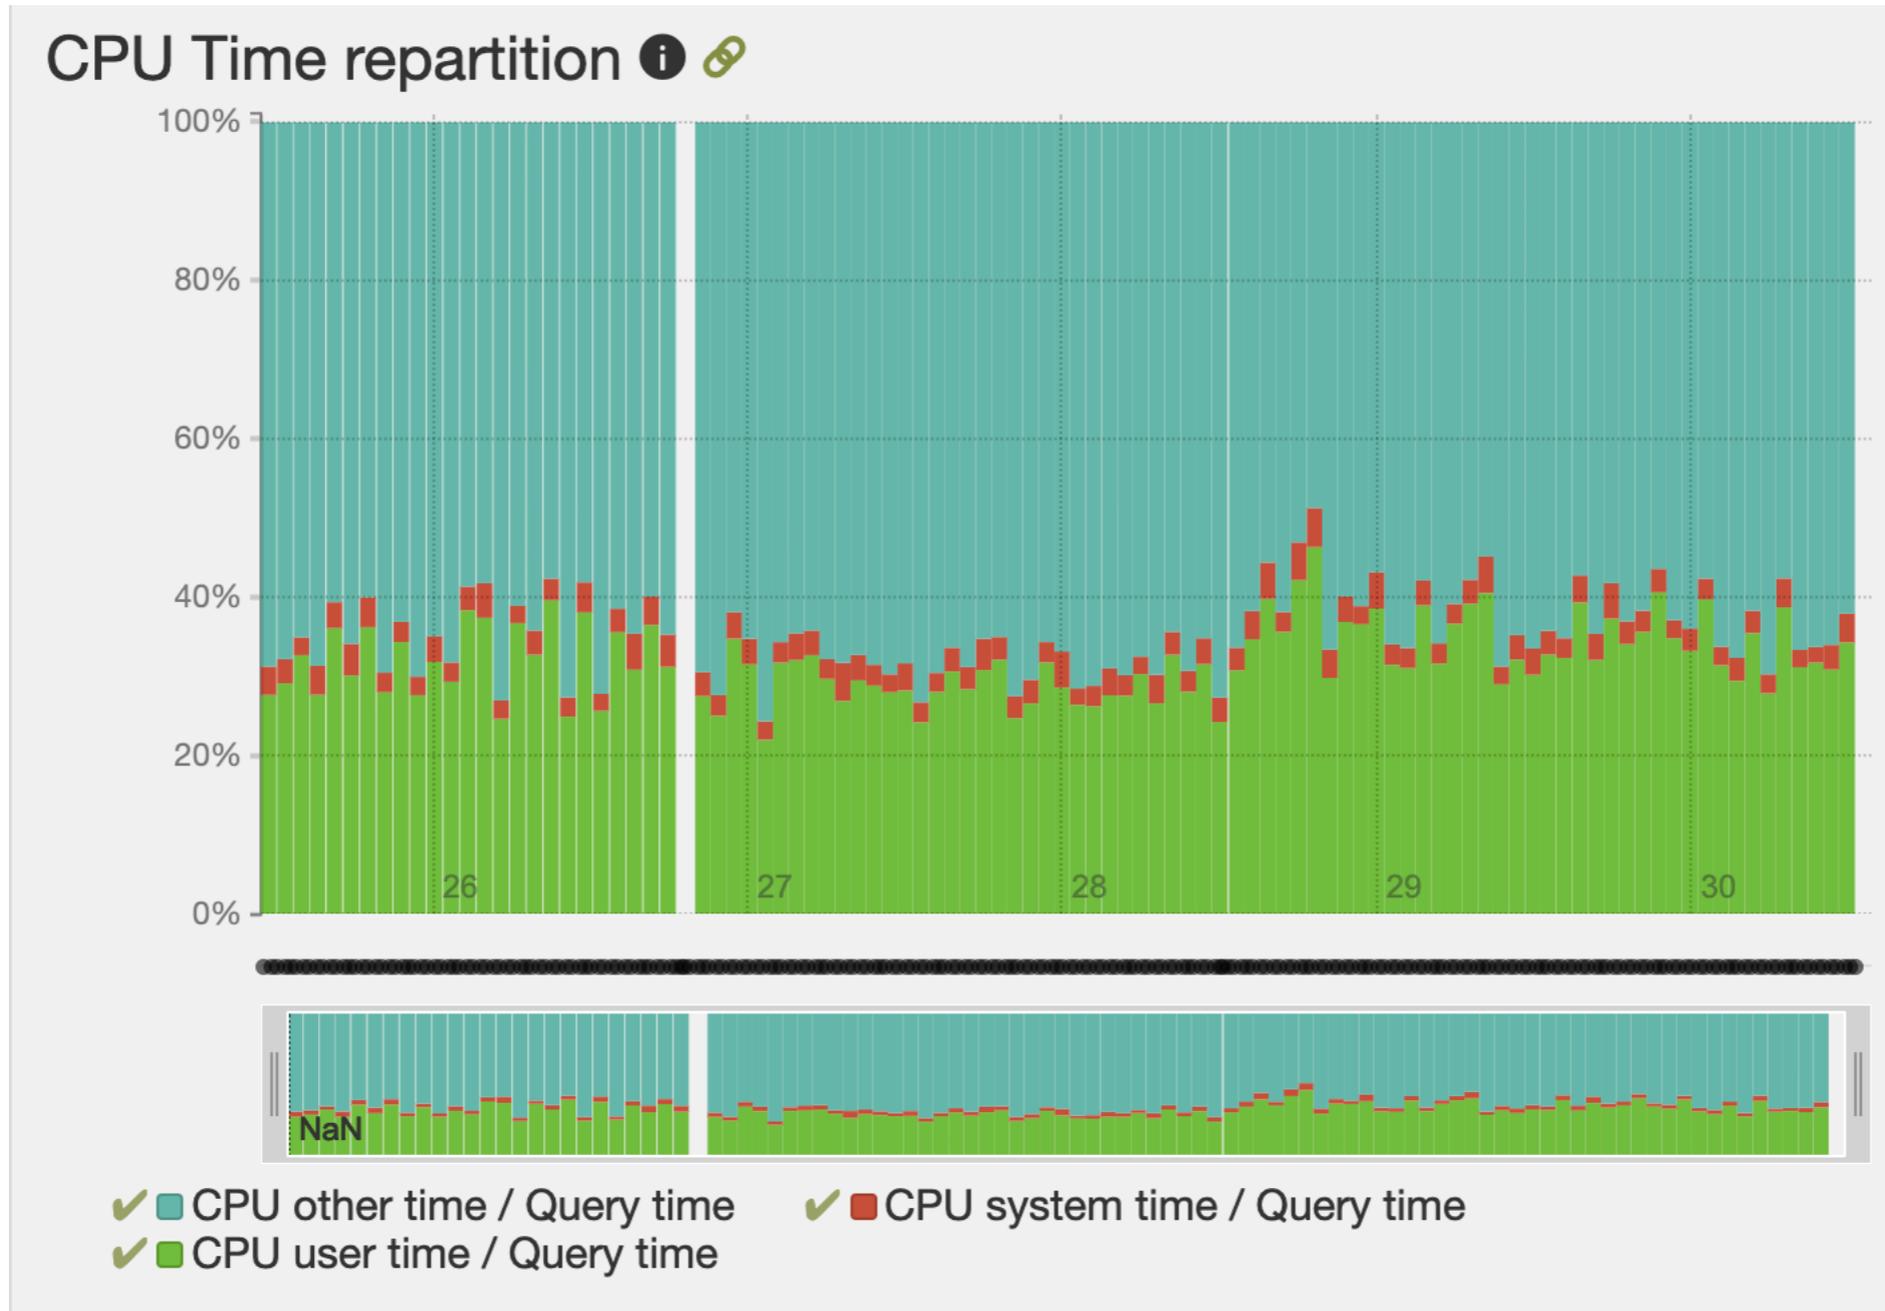

Instance ▾	Hostname	Port
<local>	localhost	5432
primary server	192.168.10.22	5432
standby server	192.168.10.22	5433

# System metrics

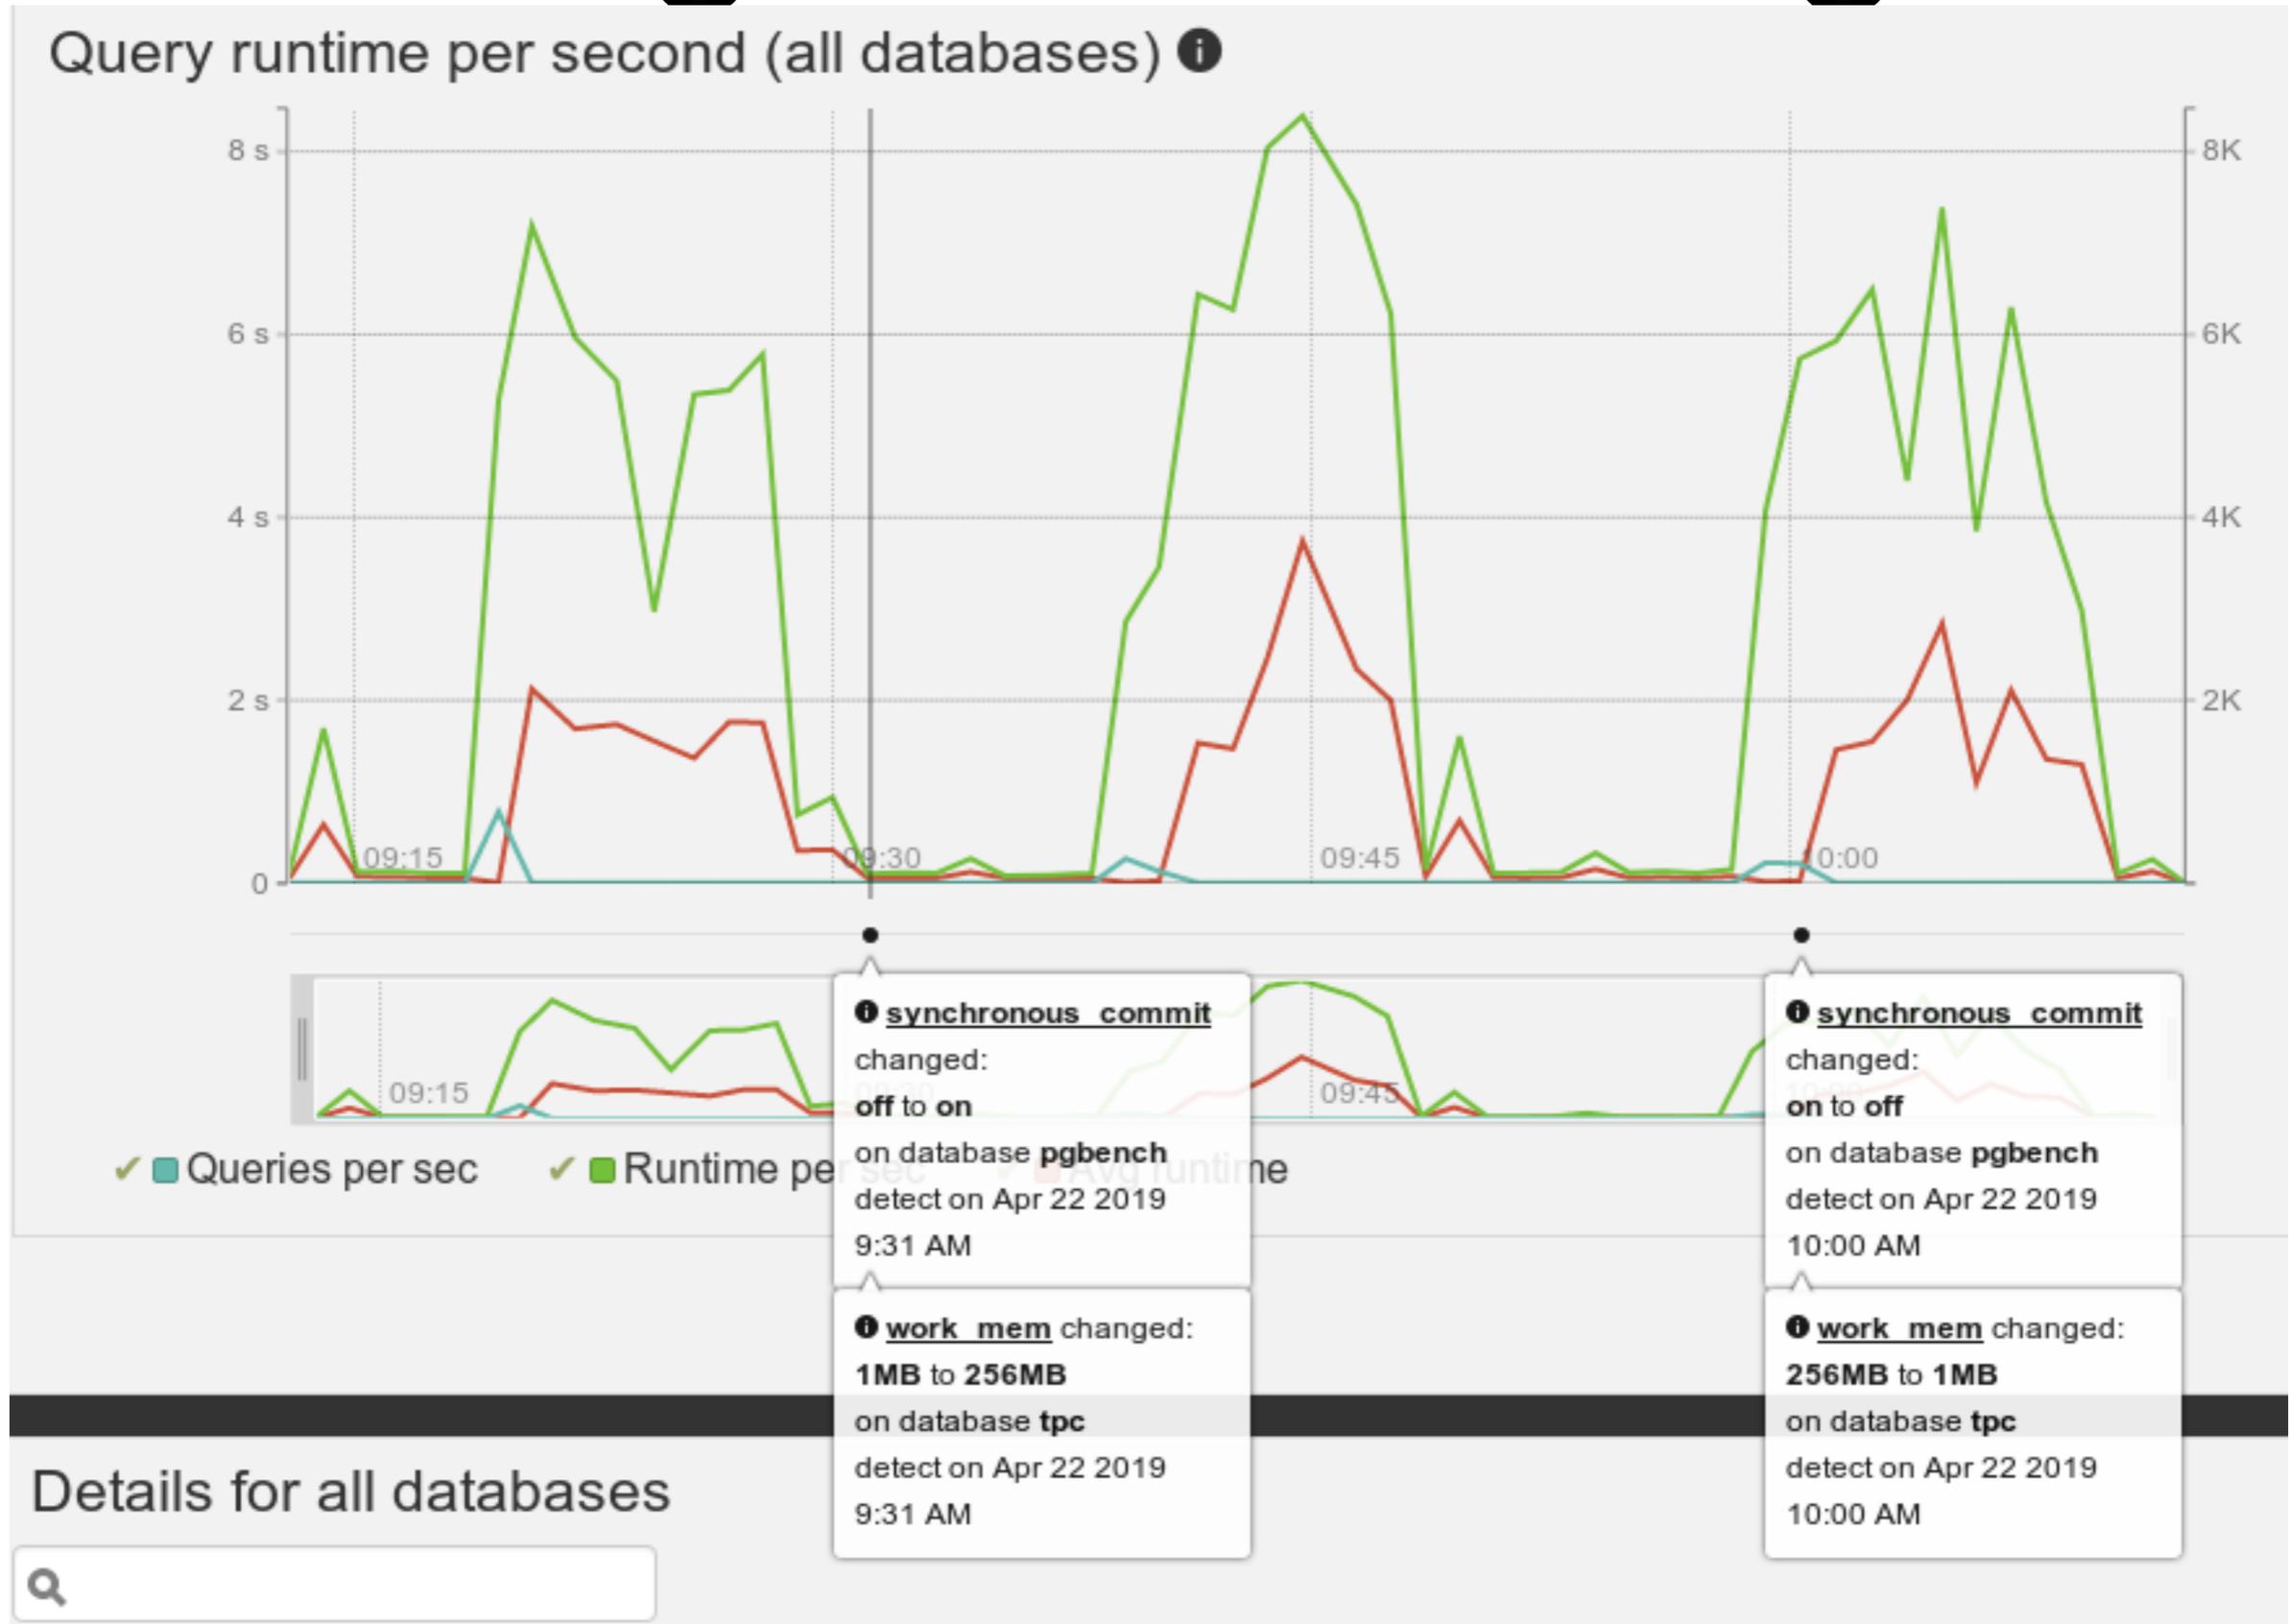

# CPU usage

# "Real" hit-ratio

# Configuration changes

# Wait events

Query detail PG Cache IO **Wait Events** Predicates

### Wait Events (per second)

19:15 19:30 19:45 20:00

Legend: IO, Activity, Timeout, Buffer pin, IPC, Lock, Extension, Client, Lightweight Lock

### Wait events summary

[Export CSV](#)

Event Type	Event	# of events
Lock	transactionid	1,115,383
Lock	tuple	71,752
LWLock	lock_manager	6,806
LWLock	buffer_content	1,130
LWLock	wal_insert	26
LWLock	CLogControlLock	8
LWLock	pg_qualstats	6
LWLock	ProcArrayLock	2

# Global index suggestion

Index	Used by	# Queries boosted
<code>CREATE INDEX ON public.pieces_fournisseurs USING btree(cout_piece, quantite_disponible)</code>	<pre>WHERE pieces_fournisseurs.quantite_disponible &lt; ? AND pieces_fournisseurs.cout_piece &gt;= ? WHERE pieces_fournisseurs.cout_piece &gt;= ?</pre>	2
<code>CREATE INDEX ON public.commandes USING btree(client_id, date_commande)</code>	<pre>WHERE commandes.client_id = ? AND commandes.date_commande &gt;= ? AND commandes.date_commande &lt;= ? WHERE commandes.client_id = ? WHERE commandes.date_commande &lt;= ? AND commandes.date_commande &gt;= ?</pre>	6
<code>CREATE INDEX ON public.commandes USING btree(date_commande)</code>	<pre>WHERE commandes.date_commande &lt;= ? AND commandes.date_commande &gt;= ?</pre>	2
<code>CREATE INDEX ON public.clients USING btree(solde)</code>	<pre>WHERE clients.solde &gt; ?</pre>	1

## Hypothetical index creation error

### Reason

No hypothetical index creation error.

## Query

Query	Index used	Gain
<code>SELECT COUNT(*) FROM pieces_fournisseurs WHERE cout_piece &gt;= 949;</code>	✓	31.72%
<code>SELECT count(*) FROM commandes cmd JOIN lignes_commandes lc ON lc.numero_commande = cmd.numero_commande WHERE cmd.client_id = 4994;</code>	✓	16.94%
<code>SELECT con.nom    ' ('    code_pays    ' )' FROM clients cli JOIN contacts con ON con.contact_id = cli.contact_id WHERE solde &gt; 420;</code>	✓	20.63%
<code>SELECT COUNT(*) FROM commandes WHERE date_commande BETWEEN (2006    '-01-01')::date AND (2006    '-12-21')::date AND priorite_commande LIKE '3-%%';</code>	✓	29.02%
<code>SELECT count(*) FROM commandes cmd JOIN lignes_commandes lc ON lc.numero_commande = cmd.numero_commande WHERE cmd.client_id = 4994 AND date_commande BETWEEN (2006    '-01-01')::date AND (2006    '-12-21')::date;</code>	✓	23.64%
<code>SELECT numero_commande, etat_commande FROM commandes WHERE client_id = 4994 AND date_commande BETWEEN (2006    '-01-01')::date AND (2006    '-12-21')::date;</code>	✓	99.96%
<code>SELECT numero_commande, etat_commande FROM commandes WHERE client_id = 4994 AND date_commande &gt;= (2006    '-01-01')::date;</code>	✓	99.88%
<code>SELECT COUNT(*) FROM commandes WHERE date_commande BETWEEN (2006    '-01-01')::date AND (2006    '-12-21')::date;</code>	✓	26.85%
<code>SELECT numero_commande, etat_commande FROM commandes WHERE client_id = 4994 AND EXTRACT('year' FROM date_commande) = 2006; 949;</code>	✓	88.87%
<code>SELECT numero_commande, etat_commande FROM commandes WHERE client_id = 4994 AND EXTRACT('year' FROM date_commande) = 2006;</code>	✓	99.88%
<code>SELECT COUNT(*) FROM commandes WHERE client_id = 4994 AND priorite_commande LIKE '3-%%';</code>	✓	99.87%
